

Yan Li

Beijing University of Posts and Telecommunications

Beijing, China | liyanly@bupt.edu.cn | [Google Scholar](#)

Research Interests

Trustworthy Medical AI; Multimodal AI for Healthcare; Medical Vision-Language Models; Clinical AI Agents.

Education

Beijing University of Posts and Telecommunications

Beijing, China

M.S. in Management Science and Engineering

Sept. 2025–present

Advisor: [Yawen Li](#); Co-advisor: [Guanhua Ye](#).

University of Electronic Science and Technology of China

Chengdu, China

Dual B.S. in Finance and Electronic Information Engineering

Sept. 2021–July 2025

Thesis Advisor: [Bo Liu](#).

Research Experience

CAPRA: Multimodal Auditing under Missing Clinical Metadata

ACM MM 2026 Oral

Lead Student Researcher, Beijing University of Posts and Telecommunications

- Led CAPRA, a semantic-visual multimodal framework that fuses medical images with proxy-axis tokens and calibrated posteriors for missing-metadata subgroup auditing.
- Validated fundus, dermoscopy, and chest-radiography tasks under distribution shift, improving worst-group accuracy in 14 of 15 learner–dataset settings.

Selective-Dependence Auditing for Medical LLM Fairness

Under Review

Lead Student Researcher, Beijing University of Posts and Telecommunications

- Led the Selective-Dependence Audit, separating medical judgments, care pathways, support actions, and interface effects to distinguish prohibited dependence from appropriate clinical adaptation.
- Built ClinSDA-400 and evaluated six LLMs across 1,075,020 responses in semantic-label, JSON, and MCQ formats, isolating audit displacement caused by option order and answer-symbol mapping.

MedFuse: Anatomical-Prior Fusion for Retinal Lesion Segmentation

FCS 2026

Lead Student Researcher, Beijing University of Posts and Telecommunications

- Led technical development with an ophthalmologist at Peking University First Hospital, integrating RGB fundus features with retinal vascular priors for diabetic-retinopathy lesion segmentation.
- Evaluated a hierarchical dual-encoder fusion pipeline on DDR and IDRiD across five backbones, including annotation-free priors from a multimodal large language model.

Conference Presentations

“Trust-free Personalized Decentralized Learning” Oral Presentation at IEEE BigComp 2026, Guangzhou, China.	Feb. 2026 Paper Slides
“Slot-Based Evidence Routing for Budgeted Multi-Agent Coordination” Oral Presentation at CINT 2026, Hangzhou, China.	May 2026 Paper Slides
“Auditing Historical Clinical Queries with Missing Availability Time” Oral Presentation at CCF BigData 2026, Harbin, China.	Aug. 2026 Paper Slides

Teaching

Beijing University of Posts and Telecommunications	
Big Data and Intelligent Management Teaching Assistant, graduate course, School of Economics and Management	Fall 2025
Operating Systems Teaching Assistant, undergraduate course, School of Computer Science	Spring 2026

Honors and Awards

University of Electronic Science and Technology of China	
Certificate for Honors Research	2025
“Academic Star” Award of School of Management and Economics (sole recipient)	2024
Outstanding Student Scholarship	2024
Model Student Scholarship	2023
